# FITNESS WEBSITE CHATBOT

Comprehensive Customer Knowledge Base | Demo Catalog | India

Purpose: This document is designed as a source of truth for a customer-support chatbot. It contains product facts, customer questions, purchase guidance, order support, delivery, cancellations, returns, refunds, account help, and safety boundaries.

Important: All products, prices, nutrition figures and policies below are fictional demo data created for your website. Replace them with your actual business information before connecting this document to a live chatbot.

## 1. CHATBOT BEHAVIOR RULES

• Answer only from the approved knowledge base when the question is about the store, products, orders or policies.

• Do not invent stock levels, delivery dates, discounts, coupon codes, ingredients, medical claims or refund approvals.

• If information is missing, say that the chatbot does not have that information and direct the customer to support.

• For health questions, provide general educational information only. Never diagnose disease or claim that a supplement treats/cures a medical condition.

• For allergies, pregnancy/breastfeeding, chronic disease, medication interactions, children, or serious symptoms, recommend professional healthcare advice.

• For order-specific questions, request the order number and use the actual order system if one is connected. Never guess order status.

• For policy disputes, the latest published website policy and applicable consumer law take priority over this demo document.

• Never ask a customer for a password, full card number, CVV, OTP or other sensitive authentication/payment secret.

## 2. PRODUCT CATALOG

### 1. Pulse Whey Protein - Chocolate

| | | | |
|---|---|---|---|
| Price | ₹2,499 | Pack | 1 kg |
| Calories | ~120 kcal per 30 g serving | Protein | 24 g |
| Carbs | 3 g | Fat | 2 g |
| Servings | 33 | Category | Fitness / Nutrition |

Description: Everyday whey protein powder for customers who want a convenient way to increase daily protein intake.

Ingredients: Whey protein concentrate, cocoa powder, natural/artificial flavouring, sweetener (sucralose), lecithin.

Allergens: Contains milk and soy (lecithin).

How to use: Mix 30 g with 200–250 ml water or milk. Timing is flexible; it can be used after training or whenever convenient.

Storage: Store tightly closed in a cool, dry place away from direct sunlight. Use a dry scoop.

Who it is for: Adults seeking additional dietary protein. Not a substitute for a balanced diet.

## 2. PlantPro Protein - Vanilla

| | | | |
|---|---|---|---|
| Price | ₹2,799 | Pack | 1 kg |
| Calories | ~125 kcal per 35 g serving | Protein | 22 g |
| Carbs | 5 g | Fat | 2 g |
| Servings | 28 | Category | Fitness / Nutrition |

Description: Plant-based protein blend designed for customers who prefer a dairy-free protein option.

Ingredients: Pea protein isolate, brown rice protein, vanilla flavour, cocoa butter, natural sweetener (stevia).

Allergens: Produced in a facility that may handle nuts, soy and milk.

How to use: Mix 35 g with 250 ml water or a plant-based beverage.

Storage: Keep sealed in a cool, dry place. Avoid moisture.

Who it is for: Adults looking for a plant-based protein supplement.

## 3. ElectroFit Hydration - Lemon

| | | | |
|---|---|---|---|
| Price | ₹699 | Pack | 30 sachets |
| Calories | ~20 kcal per sachet | Protein | 0 g |
| Carbs | 5 g | Fat | 0 g |
| Servings | 30 | Category | Fitness / Nutrition |

Description: Single-serve hydration powder intended for use during or after exercise and in situations involving substantial sweating.

Ingredients: Dextrose, electrolytes (sodium, potassium, magnesium), citric acid, natural lemon flavour, stevia.

Allergens: No major allergens intentionally added.

How to use: Mix one sachet in 500–750 ml water. Do not exceed label directions.

Storage: Store sachets dry and sealed.

Who it is for: Adults who need convenient fluid/electrolyte support. Not intended to diagnose or treat dehydration or illness.

## 4. Omega Active Capsules

| | | | |
|---|---|---|---|
| Price | ₹899 | Pack | 60 capsules |
| Calories | ~10 kcal per 2-capsule serving | Protein | 0 g |

| | | | |
|---|---|---|---|
| Carbs | 0 g | Fat | 1 g |
| Servings | 30 | Category | Fitness / Nutrition |

Description: Fish-oil supplement providing omega-3 fatty acids EPA and DHA.

Ingredients: Fish oil concentrate providing EPA and DHA, capsule shell (gelatin), glycerin.

Allergens: Contains fish. Capsule contains gelatin.

How to use: Take 2 capsules daily with a meal, or follow advice from a qualified healthcare professional.

Storage: Store below the recommended temperature on the label and protect from excessive heat and sunlight.

Who it is for: Adults who choose an omega-3 supplement. Customers with fish allergies or taking medication should seek professional advice first.

## 5. Creatine Mono 100% - Unflavoured

| | | | |
|---|---|---|---|
| Price | ₹999 | Pack | 250 g |
| Calories | 0 kcal per 5 g serving | Protein | 0 g |
| Carbs | 0 g | Fat | 0 g |
| Servings | 50 | Category | Fitness / Nutrition |

Description: Single-ingredient creatine monohydrate powder for customers following strength or performance training.

Ingredients: 100% creatine monohydrate.

Allergens: No major allergens intentionally added.

How to use: Typical serving is 5 g daily. Mix with water or another beverage. Consistency matters more than a specific time of day.

Storage: Keep dry and sealed. Scoop must remain dry.

Who it is for: Healthy adults interested in sports-performance supplementation. Anyone with a medical condition should ask a healthcare professional before use.

## 6. FitFuel Protein Bar - Choco Almond

| | | | |
|---|---|---|---|
| Price | ₹99 | Pack | 60 g bar |
| Calories | ~220 kcal per bar | Protein | 15 g |
| Carbs | 24 g | Fat | 8 g |
| Servings | 1 | Category | Fitness / Nutrition |

Description: Portable protein snack for customers who want a convenient option between meals or around workouts.

Ingredients: Milk protein, oats, dates, almond pieces, cocoa, peanut butter, chicory fibre, sweetener.

Allergens: Contains milk, almonds and peanuts.

How to use: Eat as a snack. It is not intended to replace all meals.

Storage: Keep sealed at room temperature away from heat and moisture.

Who it is for: Adults seeking a higher-protein snack. Check allergens carefully.

## 7. Daily Multivitamin - 60 Tablets

| | | | |
|---|---|---|---|
| Price | ₹599 | Pack | 60 tablets |
| Calories | Negligible | Protein | 0 g |
| Carbs | <1 g | Fat | 0 g |
| Servings | 60 | Category | Fitness / Nutrition |

Description: General multivitamin/mineral supplement designed to complement, not replace, a varied diet.

Ingredients: Vitamin and mineral blend including vitamins A, C, D, E, B-complex, zinc and selenium.

Allergens: Check the label for the current excipient/allergen statement.

How to use: One tablet daily with food unless the product label or healthcare professional says otherwise.

Storage: Store in a cool, dry place with the container tightly closed.

Who it is for: Adults seeking general nutritional supplementation. Avoid doubling up with other products containing the same vitamins/minerals without professional advice.

## 8. Pre-Workout Energy - Berry

| | | | |
|---|---|---|---|
| Price | ₹1,299 | Pack | 300 g |
| Calories | ~15 kcal per 10 g serving | Protein | 0 g |
| Carbs | 3 g | Fat | 0 g |
| Servings | 30 | Category | Fitness / Nutrition |

Description: Pre-workout drink mix intended for adults who want a caffeinated training beverage.

Ingredients: Citrulline malate, beta-alanine, caffeine, natural berry flavour, citric acid, sweetener.

Allergens: No major allergens intentionally added.

How to use: Mix one serving with water before exercise according to label directions. Do not combine with large amounts of caffeine from other sources.

Storage: Keep sealed and dry. Avoid excessive heat.

Who it is for: Healthy adults who tolerate caffeine. Not recommended for children or people sensitive to caffeine.

## 9. Recovery Electrolyte Gummies - Orange

| | | | |
|---|---|---|---|
| Price | ₹499 | Pack | 60 gummies |
| Calories | ~40 kcal per 4-gummy serving | Protein | 0 g |
| Carbs | 10 g | Fat | 0 g |
| Servings | 15 | Category | Fitness / Nutrition |

Description: Chewable electrolyte product for convenient use around exercise or heavy sweating.

Ingredients: Glucose syrup, pectin, sodium citrate, potassium citrate, natural orange flavour, citric acid.

Allergens: No major allergens intentionally added.

How to use: Take 4 gummies with water according to label directions.

Storage: Keep cool and dry. Avoid leaving in a hot car.

Who it is for: Adults seeking a convenient electrolyte format. Not a treatment for medical dehydration.

## 10. Smart Shaker Bottle - 700 ml

| | | | |
|---|---|---|---|
| Price | ₹449 | Pack | 700 ml |
| Calories | Not applicable | Protein | Not applicable |
| Carbs | Not applicable | Fat | Not applicable |
| Servings | Not applicable | Category | Fitness / Nutrition |

Description: Leak-resistant shaker bottle with measurement markings and mixing ball for protein or hydration drinks.

Ingredients: Food-grade BPA-free plastic body, stainless-steel mixing ball, polypropylene lid.

Allergens: No food allergens; wash before first use.

How to use: Add liquid first, then powder, close securely and shake. Hand washing is recommended for the lid and mixing ball.

Storage: Keep open to air-dry after washing. Do not store with liquid inside for extended periods.

Who it is for: General fitness and hydration use.

# 3. CUSTOMER FAQ KNOWLEDGE

## General Website & Brand

**Q: What is this website?**

A: This website sells fitness, nutrition and wellness products and provides general product information. It is not a medical clinic and the chatbot does not diagnose disease.

**Q: Are these products real or demo products?**

A: The catalog in this knowledge base is a demo catalog created for the website chatbot. Replace the names, prices, nutrition facts, ingredients and policy details with your actual business data before launch.

**Q: Do you provide medical or nutrition advice?**

A: We provide general product and fitness information, not personalized medical diagnosis or treatment. For medical conditions, pregnancy, medication interactions, allergies, or significant symptoms, consult a qualified healthcare professional.

**Q: How can I contact support?**

A: Customers can use the website contact form, support email or WhatsApp support button shown on the website. Support hours should be configured by the business owner.

**Q: What information should I have ready when contacting support?**

A: Keep your order number, registered phone/email, product name, issue description and photos/videos if the issue is physical damage or a defective item.

## Products & Buying

**Q: How do I choose a protein product?**

A: Start with dietary preference, protein target, allergies, serving convenience and budget. Dairy users may prefer whey; customers avoiding dairy can consider the plant protein. The chatbot should not claim that one protein is medically superior for everyone.

**Q: Which product has the highest protein per serving?**

A: Pulse Whey provides about 24 g protein per 30 g serving. PlantPro provides about 22 g per 35 g serving. FitFuel Protein Bar provides about 15 g per bar.

**Q: Which products are vegetarian?**

A: PlantPro is plant-based. Whey and fish-oil products are not vegan. Always check the current label for ingredient and allergen information.

**Q: Are any products vegan?**

A: PlantPro Protein is formulated as plant-based. Customers with strict vegan requirements should verify the current packaging and manufacturing statement before purchase.

**Q: Which product is caffeine-free?**

A: Pulse Whey, PlantPro, Creatine Mono, FitFuel Protein Bar, Multivitamin and Smart Shaker are not formulated as caffeine products. ElectroFit and the electrolyte gummies are also not caffeine products. Pre-Workout Energy contains caffeine.

**Q: Which product is best for beginners?**

A: There is no single best product for every beginner. For basic supplementation, customers often start with a protein product if they struggle to meet protein needs through food. A shaker is useful but optional.

**Q: Can I take multiple products together?**

A: Some products can be combined, but customers should check overlapping ingredients, total caffeine, vitamins/minerals and personal medical circumstances. Do not stack products blindly.

**Q: Can I use these products for weight loss?**

A: No product guarantees weight loss. Body-weight change primarily depends on overall energy intake, activity and other factors. Protein can help with satiety and meeting protein needs, but it is not a fat-loss drug.

**Q: Are these products meal replacements?**

A: Unless a product is explicitly labeled as a meal replacement, it should not be treated as one. Protein powders and bars are supplements/snacks, not automatically nutritionally complete meals.

**Q: How should I compare price?**

A: Compare price per serving rather than only the pack price. Example: Pulse Whey is ₹2,499 for about 33 servings, or roughly ₹76 per serving.

## Nutrition & Fitness Guidance

**Q: How much protein should I consume?**

A: Protein needs vary by body size, age, activity, goals and health status. A common sports-nutrition range for healthy exercising adults is roughly 1.2–2.0 g/kg/day, but individual needs vary. The chatbot should avoid presenting this as a medical prescription.

**Q: Should I take protein immediately after a workout?**

A: It is not necessary to consume protein within a tiny post-workout window. Daily protein intake and overall diet matter more. A protein serving after training can simply be a convenient option.

**Q: When should I take creatine?**

A: Creatine can be taken consistently at a convenient time. The important point is regular daily use rather than a special minute-by-minute timing window.

**Q: Does creatine cause dehydration?**

A: Creatine is not generally considered a dehydration-causing supplement when used appropriately with normal fluid intake. It can increase water stored in muscle, which may increase body weight.

**Q: Does creatine contain protein?**

A: No. Creatine monohydrate is a different compound and is not a protein source.

**Q: Does the pre-workout contain caffeine?**

A: Yes. The demo Pre-Workout Energy contains caffeine. Customers sensitive to caffeine should use caution and avoid combining it with excessive caffeine from coffee, energy drinks or other supplements.

**Q: Can children use these products?**

A: The chatbot should not recommend performance supplements or caffeinated pre-workouts to children. Parents/guardians should consult a qualified healthcare professional about any supplement use.

**Q: Can pregnant or breastfeeding customers use these products?**

A: Do not give a blanket approval. Customers who are pregnant or breastfeeding should consult their healthcare professional before using supplements, especially products containing caffeine, herbs or concentrated nutrients.

**Q: Can I use supplements if I take medication?**

A: Potential interactions are possible. The customer should speak with a doctor or pharmacist and provide the exact product label and medication list.

**Q: I have an allergy. What should I do?**

A: Check the allergen statement on the current package. Do not rely only on the chatbot. If the product contains an allergen you must avoid, do not purchase/use it.

## Orders, Payment & Checkout

**Q: How do I place an order?**

A: Select a product, choose the required quantity, add it to the cart, review the order, enter delivery details, select an available payment method and confirm the order.

**Q: Can I change my order after placing it?**

A: Contact support as soon as possible with the order number. Changes may be possible before dispatch but cannot be guaranteed once the order has entered fulfillment.

**Q: What payment methods do you accept?**

A: The website can support UPI, cards, net banking and other payment methods enabled by the payment gateway. The exact options shown at checkout are the valid options.

**Q: Is Cash on Delivery available?**

A: COD can be offered if enabled for the customer's pin code and order value. Availability should be determined at checkout.

**Q: My payment was successful but the order is not confirmed. What do I do?**

A: Do not immediately place a duplicate order. Check whether the amount has been reversed or is pending, then contact support with the transaction reference, payment time and order details.

**Q: I was charged twice. What should I do?**

A: Contact support with both transaction references. The business should verify the payment gateway and order records and refund any duplicate successful charge.

**Q: Can I use a discount code?**

A: Enter the code in the coupon field at checkout. Only one code may be used unless the website explicitly allows stacking. Codes may have minimum cart values, expiry dates or product restrictions.

**Q: Can I cancel an order?**

A: Orders may be cancelled before dispatch. Once shipped, cancellation may no longer be possible and the customer may need to follow the return/refusal process.

## Shipping & Delivery

**Q: Where do you deliver?**

A: Demo policy: delivery is available across serviceable Indian pin codes. Some remote locations may have longer delivery times or may be excluded by courier service.

**Q: How long does delivery take?**

A: Demo estimate: 3–7 business days after dispatch for most serviceable locations. Remote areas can take longer. The actual ETA shown at checkout or in tracking takes priority.

**Q: How can I track my order?**

A: Use the tracking link shared after dispatch or contact support with your order number.

**Q: What if my package is delayed?**

A: Check the tracking status first. If there is no meaningful movement beyond the expected delivery window, contact support so the courier case can be investigated.

**Q: What if the package arrives damaged?**

A: Do not discard the packaging. Take clear photos/videos of the outer package, shipping label and product damage and contact support as soon as possible.

**Q: What if I receive the wrong product?**

A: Contact support with the order number and clear photos of the product and shipping label. Do not use the product until support provides instructions.

**Q: What if an item is missing from my order?**

A: Check the invoice and package contents. Contact support with the order number and photos of the package if possible.

## Cancellation, Returns, Refunds

**Q: What is the cancellation policy?**

A: Demo policy: cancellation is allowed before the order is dispatched. After dispatch, cancellation is not guaranteed. Contact support immediately with the order number.

**Q: What is the return policy for supplements?**

A: For hygiene and safety, opened or used consumable supplements are generally not eligible for return unless the item is defective, damaged in transit, or incorrectly supplied. The business should verify the final condition and applicable consumer-law requirements.

**Q: Can I return an unopened product?**

A: Demo policy: unopened, unused and sealed products may be eligible for a return request within 7 days of delivery, subject to approval and the product category's conditions.

**Q: Can I return a protein powder after opening it?**

A: Normally no, unless there is a verified defect, damage, contamination concern, wrong item, or another approved reason. Contact support before sending anything back.

**Q: Can I return a shaker bottle?**

A: An unused shaker may be eligible for return within 7 days if it meets the return conditions. Used products are generally not eligible unless defective.

**Q: What if I received a damaged product?**

A: Contact support within 48 hours of delivery with photos/videos and the order number. The support team will assess replacement or refund eligibility.

**Q: How do refunds work?**

A: Once a refund is approved, it is initiated to the original payment method where possible. Bank/payment-provider processing time can vary. COD refunds should follow the business's configured refund process.

**Q: How long does a refund take?**

A: Demo estimate: after approval, allow 5–10 business days for the refund to reflect, depending on the payment provider/bank. The actual gateway timeline takes priority.

**Q: Who pays return shipping?**

A: For approved wrong-item, defective or transit-damage cases, the business should normally arrange or reimburse return logistics. For voluntary returns, the business may deduct return shipping if its final policy permits.

## Account & Privacy

**Q: Do I need an account to order?**

A: If guest checkout is enabled, no. If the website requires an account, the customer can create one using their email or phone number.

**Q: I forgot my password. What do I do?**

A: Use the 'Forgot Password' option and follow the verification link or OTP process.

**Q: Can I change my delivery address?**

A: Before dispatch, contact support immediately. After dispatch, changes may be limited by the courier.

**Q: How is my personal information used?**

A: Personal information should be used to process orders, provide support, communicate order updates and meet legal/business requirements. The final website privacy policy controls the exact details.

**Q: Is my payment information stored by the website?**

A: Payment details are generally processed by the payment gateway. The website should not store sensitive card information unless it has the required secure infrastructure and compliance.

## Product-Specific Quick Answers

**Q: What is the price of Pulse Whey?**

A: ₹2,499 for 1 kg in this demo catalog.

**Q: How many servings are in Pulse Whey?**

A: Approximately 33 servings at 30 g per serving.

**Q: How many calories are in Pulse Whey?**

A: Approximately 120 kcal per 30 g serving.

**Q: How much protein is in Pulse Whey?**

A: Approximately 24 g per 30 g serving.

**Q: What is the price of PlantPro?**

A: ₹2,799 for 1 kg.

**Q: How much protein is in PlantPro?**

A: Approximately 22 g per 35 g serving.

**Q: What is the price of Creatine Mono?**

A: ₹999 for 250 g.

**Q: How much creatine is in one serving?**

A: 5 g of 100% creatine monohydrate per typical serving.

**Q: What is the price of the Pre-Workout?**

A: ₹1,299 for 300 g.

**Q: Does the Pre-Workout have caffeine?**

A: Yes. The demo product contains caffeine. Customers should follow the package directions and account for caffeine from other sources.

**Q: What is the price of the Protein Bar?**

A: ₹99 per 60 g bar.

**Q: How much protein is in the Protein Bar?**

A: Approximately 15 g per bar.

**Q: What is the price of ElectroFit?**

A: ₹699 for 30 sachets.

**Q: How many calories are in ElectroFit?**

A: Approximately 20 kcal per sachet.

**Q: What is the price of Omega Active?**

A: ₹899 for 60 capsules.

**Q: Does Omega Active contain fish?**

A: Yes. It contains fish oil and therefore is not suitable for customers avoiding fish.

**Q: What is the price of the Multivitamin?**

A: ₹599 for 60 tablets.

**Q: What is the price of the Smart Shaker?**

A: ₹449 for a 700 ml bottle.

# 4. CHATBOT INTENT & RESPONSE MAP

| Intent | Typical customer wording | Required response |
|---|---|---|
| Product price | How much is X? | Give current catalog price and pack size. |
| Nutrition | How many calories/protein? | Give the listed serving nutrition; do not invent values. |
| Ingredients | What's inside X? | Give ingredients and allergen statement. |
| Recommendation | Which is best for me? | Ask goal, diet preference, allergies, caffeine tolerance and budget; give non-medical guidance. |
| Order status | Where is my order? | Ask for order number and use connected order data. |
| Cancellation | Cancel my order | Check dispatch status and apply current cancellation policy. |
| Return | I want to return it | Identify product condition, reason and delivery date; apply policy. |
| Refund | Where is my refund? | Check refund/order system if connected; otherwise escalate to support. |
| Damaged item | Package arrived damaged | Ask for photos/order number; follow damage workflow. |
| Wrong/missing item | I received the wrong item | Collect order number and photos; escalate for fulfillment review. |
| Payment failure | Money deducted but order failed | Do not duplicate order; collect transaction reference and escalate. |
| Safety | Can I take this with medicine? | Do not approve; advise pharmacist/doctor review. |
| Allergy | I am allergic to X | Read allergen statement; if present/uncertain, advise not to use and contact support. |

# 5. OUT-OF-SCOPE & ESCALATION QUESTIONS

**Q: Can you diagnose my condition?**

A: No. The chatbot should explain that it provides general information and recommend a qualified healthcare professional.

**Q: Can you tell me what disease I have from my symptoms?**

A: No. Encourage appropriate medical evaluation, especially for severe or urgent symptoms.

**Q: Can you guarantee weight loss or muscle gain?**

A: No. Outcomes vary and depend on diet, training, sleep, genetics and other factors.

**Q: Can you tell me to stop my medication?**

A: No. Medication changes must be discussed with the prescribing clinician.

**Q: Can you approve my refund?**

A: The chatbot can explain the policy, but only the business/order system can approve a refund.

**Q: Can you guarantee delivery by a specific date?**

A: Only quote a date when the live order/shipping system provides one. Otherwise provide the normal estimated delivery window.

# 6. RECOMMENDED LIVE CHATBOT RESPONSE STYLE

- Be concise for simple questions. Give the direct answer first.
- For comparisons, use a short table or bullets.
- For product recommendations, ask only the minimum questions needed to narrow the choice.
- For complaints, acknowledge the problem without promising a refund/replacement before verification.
- For health and safety questions, be conservative and transparent about limitations.

• Never claim to have checked a system, courier, payment gateway or inventory unless that system is actually connected.

• If the customer asks something outside the knowledge base, say: 'I don't have enough verified information to answer that accurately. Please contact support.'

# 7. DATA FIELDS TO CONNECT TO YOUR REAL BACKEND

• Product ID, product name, SKU, category, live price, sale price, stock quantity, pack size, serving size, nutrition per serving, ingredients, allergens, usage directions, storage, expiry/shelf-life, images.

• Order ID, customer ID, order date, payment status, fulfillment status, courier, tracking number, dispatch date, estimated delivery date, cancellation eligibility, return eligibility, refund status.

• Customer support email, WhatsApp number, support hours, shipping zones, COD availability, return window, refund SLA, warranty terms, active coupons.

# 8. FINAL SOURCE-OF-TRUTH NOTICE

This document is a chatbot training/reference document, not a legal contract or medical reference. Before going live, replace demo information with verified product labels, current prices, actual inventory, shipping terms, payment methods, privacy policy, refund/return policy and legally reviewed terms applicable to the business.
